REFRIGERATORS BUYING GUIDE

Tips for Buying Refrigerators: How to Choose the Best Refrigerator for Your Home

HOW BIG SHOULD YOUR REFRIGERATOR BE?

- For sizing, a good rule of thumb is 3.5 cubic feet of refrigerator space per person.
- If you have a family of four and limited kitchen space, you should consider a refrigerator that has around 14 cubic feet in the refrigerator compartment and 4 cubic feet in the freezer, giving you 18 cubic feet total.
- If you're a bulk shopper, you may want to consider a refrigerator that is 21 cubic feet or greater in size. Select Frigidaire® refrigerators offer a SpaceWise™ Organization System that can help you stay organized and Humidity-Controlled Crisper Drawers.

ARE YOU LOOKING FOR A COUNTER-DEPTH REFRIGERATOR OR STANDARD-DEPTH REFRIGERATOR?

- **COUNTER-DEPTH REFRIGERATORS** offer a built-in look because the edge of the refrigerator is flush with your countertop. Only the doors and handles extend into your kitchen space. After installation, if there are gaps between the refrigerator and any surrounding cabinetry, Frigidaire sells trim kits that can fill them.
- **STANDARD-DEPTH REFRIGERATORS** are the most popular models. They provide additional storage volume compared to counter-depth models of the same width. Standard-depth refrigerators may be 4 inches (or more) deeper than your countertop, extending into your kitchen space.

ICE AND WATER DISPENSERS

- Many refrigerator models feature ice and water dispensers in the freezer door. These dispensers offer easy access to ice and water without opening the freezer. Some models have taller dispensers that are perfect for large glasses, pitchers and water bottles.

WATER AND AIR FILTRATION

- Frigidaire offers the Best in Class Ice and Water Filtration.
- With Frigidaire refrigerators, you can make sure that you always have cleaner, better-tasting water with PureSource® Ultra water filters. And you can keep your water clean and tasting great by replacing your Frigidaire water filter regularly. With Frigidaire's Water Filter Auto Delivery Program, your new replacement water filters will be shipped to your home every three to six months.
- Frigidaire Pure Air™ air filters keep the air in your refrigerator cleaner and fresher. The Pure Air™ air filter eliminates odors better than baking soda, keeping the air inside your refrigerator clean and fresh. And it's easy to replace. Just watch for the indicator light to let you know it's time.

ARE YOU LOOKING FOR A FRENCH DOOR, SIDE-BY-SIDE, OR TOP FREEZER REFRIGERATOR?

- **FRENCH DOOR REFRIGERATORS** combine the advantages of side-by-side refrigerators and top freezer refrigerators. They offer an easy view of the refrigerator compartment, plenty of space for wide items, and a deep freezer that offers plenty of storage baskets and ample space for large items. Frigidaire French Door refrigerator models are energy efficient and ENERGY STAR® Qualified.
- **SIDE-BY-SIDE REFRIGERATORS** feature two long compartments (one refrigerator, one freezer) that are parallel to one another and offer a simultaneous full view of both the refrigerator and freezer. Frigidaire side-by-side refrigerator models are energy efficient and ENERGY STAR® qualified.
- **TOP FREEZER REFRIGERATORS** have a freezer compartment on the top and a refrigerator on the bottom. The freezer offers a larger space, great for bulk foods. Overall, top freezer refrigerators have a low cost of energy for operation. Many Frigidaire top freezer refrigerators are energy efficient and ENERGY STAR® Qualified.
