REMODELING

Make Your Measurements

Frigidaire® ranges are available in widths of 30", 36" or 40". If you're replacing an existing range, you'll want to measure it and the current space, including any available cabinet space. Keep in mind that the installation space might need to be enlarged. Overhead cabinetry should not exceed 13" in depth.

Range Measurements

Before measuring your cabinet cutout, be sure to turn off the power to the range. Also, when removing the range to measure, be careful. Ranges can be extremely heavy, weighing over 300 lbs. Be sure to have someone help you.
