FIND THE RIGHT COOKWARE
Only magnetic pots and pans work with induction. Check to see if your cookware is compatible: Place a magnet on the bottom of your pot or pan — if it clings firmly, the cookware will work with your cooktop.

1 Place your cookware so it is level and centered over the cooking zone. Select a pot or pan that’s larger than the zone’s inner ring, but smaller than the outer ring.
2 Press the main Power button to turn the cooktop on.
3 If the cooktop was already on, press the cooking zone’s On-Off button.
4 Slide your finger along the gradient control until you reach your desired power level.
5 If the cooking zone cannot detect the cookware, the power level in the display will flash. The cookware may be improperly placed, the incorrect size, or incompatible with induction.

LEARN TO SPEAK INDUCTION

<table>
<thead>
<tr>
<th>DISPLAY MESSAGE</th>
<th>MEANING</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-9</td>
<td>Incremental power levels</td>
</tr>
<tr>
<td>P</td>
<td>Power Boil</td>
</tr>
<tr>
<td>L</td>
<td>Cooktop controls locked</td>
</tr>
<tr>
<td>H</td>
<td>Hot surface</td>
</tr>
</tbody>
</table>

TIP: Head over to Frigidaire.com to shop our induction-ready pots and pans.

TIP: Soft humming and clicking sounds are perfectly normal with induction.

CUT DOWN ON CLEANUP
Your cooktop heats pans directly, so the surface stays cooler and you can start cleaning just minutes after you’re done cooking, but be sure to wait until the “H” indicator has disappeared. Plus, a cooler cooktop means no burnt-on residue.

TIP: Before using your cooktop for the first time, apply a ceramic cooktop cleaning cream to the surface to protect from scratches and make it even easier to clean in the future.
COOKING BY THE NUMBERS

Cooking with induction power levels is a bit different than cooking with Hi-Med-Lo settings, but we’ve got you covered. Here’s a quick induction cheat sheet to help you choose the right power levels for some breakfast, lunch and dinner basics.*

**MELT CHOCOLATE**
Power Level: 1

**SIMMER SPAGHETTI SAUCE**
Power Level: 3–4

**COOK PANCAKES**
Power Level: 5–6

**PAN–SEAR CHICKEN**
Power Level: 7–8

**SEARED STEAK**
Power Level: 8–9

**BOIL WATER**
Power Level: P

---

**CHILD SAFETY LOCK**
The Child Lock feature allows you to deactivate the cooktop controls, so wandering hands can’t turn on any of the cooking zones.

1. Ensure your cooktop is on and all the cooking zones are off.
2. Press and hold the Lock button until “L” appears in the display.
3. To unlock, press and hold the Lock button again.

**LOCK YOUR POWER SETTINGS**
You can lock in your power level selection while you’re cooking so you don’t accidentally change the temperature.

1. Turn on a cooking zone and select your desired power level.
2. Press the lock button—the display will briefly show “L” before returning to show the selected power level.
3. If you try to change the power level, “L” will appear on the display. To unlock, press and hold the Lock button again.

**SET THE TIMER**
Your cooktop has a timer, so you can make sure your food simmers or sears for just the right amount of time.

1. Press the Timer’s On/Off button.
2. Press + and - to select a cooking time (works in whole minutes only).
3. A tone will sound when the specified time has lapsed. Press the On-Off button to stop the tone.

**TIP:** When the timer stops or is cancelled, any active cooking zones will remain on.
